## Denmark & Norway Elections

During today's Elections in Demark there has been severe problems with members not been able to cast their vote , Our network provider has said that many of the pay as you go sim providers like lyca are having issues in sending messages through the international SMS forwarding platform.

As only 24% of the votes have been polled so far we have decided to cancel todays elections and will issue a new date for fresh elections based on the same membership.

The election date will be announced once the IT team has solved the issue with the SMS providers in Denamrk.

In view of the above Norway Elections also stands cancelled until further notification.

Secretary OIC

Dr Abdullah Riar
